

# CONTENTS

Preface Page VIII

<b>CHAPTER 1</b>	
<b>Hydropower Machinery</b>	<b>Page</b>
Introduction	1.1
1.1 Brief review of hydropower machines	1.2
1.1.1 The eldest hydropower machines	1.2
1.1.2 Turbines	1.3
1.2 Arrangement of hydropower plants	1.5
References	1.7
<b>CHAPTER 2</b>	
<b>Energy Conversion</b>	<b>Page</b>
Introduction	2.1
2.1 Fundamentals and definitions	2.1
2.2 Transforming hydraulic energy into mechanical energy	2.2
2.2.1 General considerations	2.2
2.2.2 Impulse turbine - Pelton	2.3
2.2.3 Reaction turbines	2.6
2.2.4 The main equation of turbines	2.12
2.3 A brief outline of the hydraulic design of turbines	2.13
2.4 Efficiency	2.16
References	2.17
Bibliography	2.17
<b>CHAPTER 3</b>	
<b>Classification of Turbines - Main Characteristics</b>	<b>Page</b>
Introduction	3.1
3.1 Fundamental similarity considerations	3.1
3.1.1 Similarity relations	3.1
3.1.2 Speed number	3.3
3.1.3 Classification of turbines	3.4
3.1.4 Performance characteristics	3.5
3.1.5 Cavitation and suction head	3.8
3.2 Pelton turbines	3.9
3.2.1 Main hydraulic dimensions	3.9
3.2.2 Pelton bucket dimensions	3.10
3.2.3 Performance diagram	3.10
3.3 Francis turbines	3.11
3.3.1 Main hydraulic dimensions	3.11
3.3.2 Performance diagrams	3.11
3.3.3 Cavitation, suction head and reaction ratio	3.13
3.4 Kaplan turbines	3.14
3.4.1 Main hydraulic dimensions	3.14

<b>Classification of turbines - Main Characteristics (Cont.)</b>	<b>Page</b>
3.4.2 Performance diagram	3.15
3.4.3 Cavitation, suction head and reaction ratio	3.16
3.5 Choice of turbine	3.16
3.5.1 Choice between Pelton and Francis turbines	3.16
3.5.2 Choice between Francis and Kaplan turbines	3.20
References	3.20
Bibliography	3.21
<b>CHAPTER 4 Governing Principles</b>	<b>Page</b>
Introduction	4.1
4.1 Feedback control system	4.2
4.2 Governor adjustment facilities	4.4
4.2.1 Proportional-integral-derivative functions (PID)	4.4
4.2.2 Permanent speed droop	4.4
4.3 Turbine governing demands	4.5
4.3.1 Frequency and load regulation	4.5
4.3.2 Start and stop sequence control	4.5
4.3.3 Disconnection, load rejection	4.6
4.3.4 Load limiting	4.6
4.4 Regulation requirements of water power plants	4.6
4.4.1 Mass oscillation	4.6
4.4.2 Water hammer pressure rise versus closure time and speed	4.8
4.5 Governing stability	4.13
4.5.1 Modes of operation	4.13
4.5.2 Rules of thumb	4.14
References	4.15
Bibliography	4.15
<b>CHAPTER 5 Performance Tests</b>	<b>Page</b>
Introduction	5.1
5.1 Tests on prototype	5.1
5.1.1 Principles for test	5.1
5.1.2 Measurement of the turbine power	5.2
5.1.3 Methods for determination of discharge	5.2
5.1.3.1 Current meter method	5.2
5.1.3.2 Pitot tube gauging	5.3
5.1.3.3 The pressure-time method (Gibson method)	5.4
5.1.3.4 Tracer methods	5.5
5.1.3.5 Ultrasonic method	5.7
5.1.3.6 Weirs	5.9
5.1.3.7 Standardised differential pressure devices	5.10
5.1.3.8 Volumetric gauging method	5.11
5.1.3.9 Relative discharge measurement	5.11

<b>Performance Tests</b>	<b>Page</b>
<b>(Cont.)</b>	
5.1.4 Thermodynamic measurement of flow losses	5.12
5.1.4.1 Measurement of power losses	5.12
5.1.4.2 Efficiency and specific energies	5.13
5.1.4.3 Measuring technique	5.14
5.1.4.4 Corrections for leakage and friction	5.16
5.1.5 Dynamic properties of the turbines	5.16
5.1.6 Cavitation behaviour of prototype	5.16
5.1.7 Governor test - Rejection tests	5.17
5.2 Model tests and scale effect of efficiency from model to prototype	5.17
5.2.1 Laboratory qualifications	5.17
5.2.2 Model tests	5.18
5.2.3 Scale effect on efficiency from model to prototype	5.20
References	5.21
Bibliography	5.22
<b>CHAPTER 6</b>	
<b>Pelton Turbines</b>	<b>Page</b>
Introduction	6.1
6.1 Horizontal Pelton turbine arrangement	6.1
6.2 Vertical Pelton turbine arrangement	6.2
6.3 Main components and their functions	6.4
6.3.1 Runner	6.4
6.3.2 The turbine shaft	6.6
6.3.3 Turbine radial bearing	6.6
6.3.4 Bend and distributor	6.7
6.3.5 Straight flow injector	6.8
6.3.6 Deflector mechanism	6.9
6.3.7 Turbine housing	6.10
6.3 Condition control	6.10
6.3.1 Turbine guide bearing	6.10
6.3.2 Runner	6.11
6.3.3 Main injector with needle servomotor	6.11
6.3.4 Seal ring in deflector bearing	6.11
6.3.5 Filter	6.11
6.4 Monitoring instruments	6.11
6.5 Assembly and dismantling	6.12
Reference	6.12
Bibliography	6.12
<b>CHAPTER 7</b>	
<b>Francis Turbines</b>	<b>Page</b>
Introduction	7.1
7.1 Horizontal Francis turbine	7.1
7.2 Vertical Francis turbine	7.2
7.3 Main components and their functions	7.4
7.3.1 Scroll casing	7.4

<b>Francis Turbines</b>		
<b>(Cont.)</b>		<b>Page</b>
7.3.2	Guide vane cascade	7.4
7.3.3	Turbine covers	7.5
7.3.4	Runner	7.5
7.3.5	Turbine shaft and bearing	7.6
7.3.6	Shaft seal	7.7
7.3.7	Regulating mechanism	7.8
7.3.8	Draft tube	7.9
7.4	Drainage and filling system	7.9
7.5	Condition control	7.10
7.6	Monitoring instruments	7.11
7.7	Assembly and dismantling	7.11
	References	7.12
	Bibliography	7.12
<b>CHAPTER 8</b>		
<b>Kaplan Turbines</b>		<b>Page</b>
	Introduction	8.1
8.1	Kaplan turbine construction	8.1
8.1.1	Arrangement	8.1
8.1.2	Kaplan turbine construction	8.2
8.2	Main components and their functions	8.3
8.2.1	Scroll casing	8.3
8.2.2	The guide vane cascade	8.4
8.2.3	Covers	8.4
8.2.4	Runner	8.4
8.2.5	Runner blade servomotor	8.5
8.2.6	Regulating mechanism of the runner blades	8.5
8.2.7	Cooperation of the regulation of the guide vanes and the runner blades	8.6
8.2.8	Runner chamber	8.6
8.2.9	Turbine shaft	8.7
8.2.10	Turbine bearing	8.7
8.2.11	Shaft seal box	8.7
8.2.12	Draft tube	8.8
8.3	Drainage and filling arrangement	8.9
8.4	Condition control	8.9
8.4.1	Runner	8.9
8.4.2	Runner chamber	8.9
8.4.3	Guide vane mechanism	8.9
8.4.4	Shaft seal box	8.9
8.5	Monitoring instruments	8.9
8.6	Assembly and dismantling	8.10
	References	8.10
	Bibliography	8.10

<b>CHAPTER 9</b>	<b>Page</b>
<b>Bulb Turbines</b>	
Introduction	9.1
9.1 General arrangement	9.1
9.2 Main components	9.1
9.2.1 Stay cone	9.2
9.2.2 Runner chamber and draft tube cone	9.2
9.2.3 Generator hatch	9.3
9.2.4 Stay shield	9.3
9.2.5 Rotating parts	9.3
9.2.5.1 The runner	9.4
9.2.5.2 The turbine shaft	9.4
9.2.6 Shaft seal box	9.4
9.2.7 Turbine shaft bearing	9.6
9.2.8 The feedback mechanism and oil piping	9.7
9.2.8.1 The oil transfer unit	9.7
9.2.9 The guide vane mechanism	9.7
9.3 Condition control	9.8
9.3.1 Runner	9.9
9.3.2 Runner chamber	9.9
9.3.3 Guide vane mechanism	9.9
9.3.4 Shaft seal box	9.9
9.3.5 Generally for Bulb turbines	9.9
9.4 Monitoring instruments	9.9
9.5 Assembly and dismantling	9.10
References	9.10
Bibliography	9.10
<b>CHAPTER 10</b>	
<b>Governors</b>	<b>Page</b>
10.1 Governor system structure	10.1
10.2 Electrohydraulic controllers	10.2
10.2.1 Analogous controller	10.2
10.2.2 Digital computer based controller	10.3
10.3 Servo system	10.4
10.3.1 Governor desk	10.4
10.3.2 Main control servomotor	10.6
10.4 Specific turbine governing equipment	10.6
10.4.1 Dual control of Pelton turbines	10.6
10.4.2 By-pass control for Francis turbines	10.7
10.4.2.1 Function and general arrangement	10.7
10.4.2.2 The valve control system	10.8
10.4.3 Dual control of Kaplan/Bulb turbines	10.9
References	10.10
Bibliography	10.10

<b>CHAPTER 11</b>	<b>Page</b>
<b>Valves</b>	
Introduction	11.1
11.1 Spherical valves	11.1
11.1.1 Valve housing and valve rotor	11.1
11.1.2 Valve rotor trunnions and bearings	11.2
11.1.3 Seals for closed valve	11.2
11.1.3.1 Main seal	11.3
11.1.3.2 Auxilliary seal	11.4
11.1.4 Operation mechanism	11.4
11.1.5 Control system	11.5
11.2 Butterfly valves	11.6
11.2.1 Valve housing	11.6
11.2.2 Valve disc	11.6
11.2.3 Bearing	11.7
11.2.4 Seal	11.7
11.2.5 Operating mechanism	11.8
11.3 Gate valves	11.8
11.5 Ring valves	11.9
11.6 The bypass valve	11.10
11.7 Guidelines for inspection of valves	11.11
References	11.12
Bibliography	11.12
<b>CHAPTER 12</b>	<b>Page</b>
<b>Auxilliary Equipment</b>	
Introduction	12.1
12.1 Oil pressure system	12.1
12.1.1 System construction	12.2
12.1.2 System operation	12.7
12.2 Air supply system	12.8
References	12.10
<b>CHAPTER 13</b>	<b>Page</b>
<b>Forces transferred to the foundations</b>	
Introduction	13.1
13.1 Horizontal turbines	13.1
13.2 Vertical turbines	13.2
References	13.4

<b>CHAPTER 14</b>	<b>Page</b>
<b>Causes to damages</b>	
Introduction	14.1
14.1 Cavitation	14.1
14.2 Sand erosion	14.2
14.3 Material defects	14.3
14.4 Fatigue	14.5
References	14.6
<b>CHAPTER 15</b>	<b>Page</b>
<b>Condition Control</b>	
Introduction	15.1
15.1 Activities for Pelton turbine	15.1
15.2 Activities for Francis turbines	15.2
15.3 Activities for Kaplan and Bulb turbines	15.3
References	15.4
<b>CHAPTER 16</b>	<b>Page</b>
<b>Quality Assurance (QA)</b>	
Quality assurance	16.1
References	16.3
