

Meeting Minutes 12

Date: 11/8/11

Meeting Minutes Start 2:50pm

- Emailed Lenard about sample data and acquiring old transducers written by Dustin
- Dustin must talk to guy at his work to see if we can attach our flow meter to some pipe so we can get some data and calibrate our sensors
- Goals for after this deliverable/ near future:
 - o Must sit down and discuss clamping mechanism for our “kit”
 - o Mobile app to plot live data through Bluetooth from a computer soon to demonstrate to GE
- Bios and profile pictures must be sent to Khristofer ASAP deadline 17th Nov.
- Preparations for next deliverable:
 - o Write what we will say and present in paragraph form
 - o Present our “speeches” to group and team will create slides to correspond to what is said. This will improve our presentation and make our slides backup what we say instead of us explaining our slides which was a critique from last presentation
 - o Self-asserted deadline for Friday 11th Nov. where we will meet to present to the group and create slides at 12:00pm noon.
 - o Thinking about meeting a second time to review and revise presentation on Sunday time TBA.

End time 4:00pm
