

# We Want YOU!

Connelly & Wicker Inc. is a full-service civil engineering firm providing professional services in both the public and private sectors of land development.

The firm was incorporated in 1983 in Jacksonville Beach Florida. In 1985, a second full-service office was opened in Destin, Florida to serve the northwestern part of the state. Connelly & Wicker provides these services throughout North Florida and south to Central Florida:

- Due Diligence Studies
- Land Use Planning
- Commercial Site Design
- Stormwater Management Master Planning, Design & Permitting
- Water & Sewer Master Planning, Design & Permitting
- Traffic Analysis, Parking & Shared Use Parking Studies
- Residential/Subdivision Site Design
- Construction Administration & Inspections
- Highway Design
- Waterfront Facilities Design & Permitting
- Beach Access Design & Permitting

We are a medium-sized firm including 10 registered Professional Civil Engineers with experience in land development/site civil engineering and transportation engineering. Half of our business is derived from transportation engineering projects for the Florida Department of Transportation and municipal agencies as well as facilities site engineering for public projects. The balance of our work consists of private sector development. We perform comprehensive engineering services for commercial, retail, institutional, industrial and office projects as well as single-family and multi-family residential land development endeavors.

## Our Firm WANTS YOU!

Connelly & Wicker seeks recent Engineering Graduate and designer to join our staff in **Destin, Florida**. Qualified candidates shall have a Bachelors Degree in Civil engineering with a focus in land development or transportation engineering, be proficient in AutoCAD or MicroStation and related design software, and have a desire to excel as a key team member.

Since 1983, Connelly & Wicker, Inc. has continued to provide professional services for both public and private sector of development. Our project teams are a blend of senior and junior professionals, men and women, dedicated to the science of civil engineering. We are committed to guiding, training and supporting tomorrow's professionals. And as leaders in our industry, we encourage that all project team professionals continually refine the art of our practice through additional education opportunities and through collaboration with one another.

**At Connelly & Wicker, everyone is a critical part of the whole.**
