

**Announcing a Vacant Engineering Specialist I Position
Bureau of Water Facilities Regulation
Industrial Wastewater Section**

There is an immediate opening for a qualified individual as an Engineering Specialist I in the Industrial Wastewater Section of the Division of Water Resource Management.

Minimum qualifications require a Bachelor's degree with a major in an area of engineering. Preferably the selected candidate will have a degree in environmental, chemical, or civil engineering.

The position provides technical and regulatory assistance to district offices and regulated industries and implements special projects under the direction of a Professional Engineer Supervisor. Specific duties may include:

- assisting in the development and implementation of rules and guidance policies for generic permits and individual permits in various industry categories
- review of draft permits for technical quality and consistency with Department and EPA requirements
- engineering research, field inspections, and coordination with districts, industry, and other agencies on engineering aspects of industrial wastewater facilities.

Requirements for this position include the ability to analyze interpret and apply engineering data, skill in using business and engineering computer applications, and the ability to communicate engineering and regulatory information effectively both in writing and verbally. Knowledge in industrial wastewater treatment processes and regulations is desirable but not required.

Annual salary range \$33,824.96 – 56,769.70. New employees are generally hired at the base rate.

For more information please contact Allen Hubbard, P.E. at (850) 245-8590 or SunCom 205-8590.

To apply, submit a completed State of Florida Employment Application by April 30, 2006 to:

Allen Hubbard, P.E.
Industrial Wastewater Administrator
2600 Blair Stone Road
