

## **POSITION VACANCY FOR AN ENGINEERING SPECIALIST I**

There is an immediate opening for a qualified individual as an Engineering Specialist I in the Industrial Pretreatment Program, Domestic Wastewater Section of the Division of Water Resource Management.

Minimum qualifications require a Bachelor's degree with a major in an area of engineering. Preferably the selected candidate will have a degree in civil, environmental, or chemical engineering.

Duties and responsibilities include:

Performs technical review of industrial pretreatment program submissions and modifications, reviews annual pretreatment reports, provides guidance to local governments developing or implementing pretreatment programs, provides technical assistance to governments and industries on wastewater management issues relating to pretreatment issues, assists in preparing reports on program effectiveness to the Department and EPA, assists in revising state rules related to pretreatment as necessary, assists in conducting training activities to pretreatment personnel, responsible for maintaining and distributing reference material related to the pretreatment program.

Annual salary range \$33,824.96 – 56,769.70. New employees are generally hired at the base rate.

To apply, submit a completed State of Florida Employment Application by April 30, 2006 to:
