

POSITIONS AVAILABLE – ENGINEERS AND GEOLOGISTS

**GEOSYNTEC
CONSULTANTS**

*GeoSyntec Consultants is a growth-oriented national environmental consulting firm providing innovative solutions in the fields of contamination assessment/remediation, environmental due diligence/compliance, solid waste and water resources. We are seeking top candidates for positions in our **Florida** offices. Candidates must have a degree in **engineering** or **geology**, as well as superior communication and computer skills. An M.S. and the ability to become professionally licensed are preferred.*

About GeoSyntec . . .

GeoSyntec provides private and public sector clients with earth and environmental sciences consulting services; environmental, geotechnical, and hydrological engineering consulting and design services; and construction management and quality assurance services for projects involving these practices. We are an employee-owned company with offices throughout the United States and in Canada, Malaysia, and the United Kingdom. Our company philosophy is that all professionals, including principals, maintain their focus on their professional practice and client relationships.

Since our founding in 1983, our business has grown around projects involving environmental studies and restoration, natural resources management, and engineering and design for the solid waste disposal, water resources, and transportation infrastructures. We are nationally known for our practice leadership, broad experience, technological innovation, and exceptional client service.

Our professionals continue to develop new technology applications and practice capabilities. Our applied research partnerships with leading universities, NASA, and others are producing better methods for the remediation of recalcitrant chemicals in the environment; development and conservation of water resources; management of urban watersheds to reduce pollutant loadings; protection of

endangered species from the impacts of storm water runoff; design and construction of industrial and municipal waste disposal facilities; and geotechnical analysis and design of transportation facilities.

GeoSyntec's goals are to provide the best possible service and value to our clients, to advance technology in our primary practice areas, and to provide a stimulating, progressive, and friendly work environment that will enable us to continue to recruit and retain great staff.
