

CEG 2202L Intro to Geomatics Lab

Lab Safety Policy

1. For the computer lab follow the College of Engineering Lab Instructions. The College of Engineering policy states no food or drinks allowed during laboratory work. However, since most of the laboratory is performed outside it is allowable to bring and consume only bottled water.
2. The majority of the laboratory work is performed outside. Therefore, check the weather and dress appropriately. For example wear warm cloth when it's cold, bring a hat when it's sunny, etc.
3. Wear closed toe shoes. You could risk injuring yourself if you don't.
4. Obey the Teaching Assistants' instructions at all times.
5. Return all equipment used in the lab to the storage room before you leave.

I have read and understood the laboratory safety policy and I will abide by the policy.
